And Now The Conclusion...Or Is It Just The Beginning?

Well here we are at the end of our mini course. I hope you've been inspired to build a web business for yourself and model one (or more than one) of the people you've read about over the last few days.

These 6 people offer living proof that you can find a market online for a wide range of diverse topics and build a business you'll love working on if you follow a proven system.

Nearly every web business has several additional income streams which are not exploited by their owners for a variety of reasons.

Let's look at just two more potential opportunities practically every website owner has that most don't use so you get the idea...

1) An international travel business. By joining with an online merchant who offers discount airfares (there are lots of them these days), you can receive a referral fee on every airfare or travel package booked through you site.

Travel and airfares are big business online. You could use the credibility you have with your visitors and readers and affiliate with one of the big online travel merchants to offer packages and deals.

2) A mail order business. As an example, people love Anguilla, and many would live there all year round if they could. But most can only spend their holidays there for a few weeks or months each year.

With a mail order business, Nori (and anyone else who builds a website around a holiday spot) has the opportunity to sell people 'Anguilla Stuff' all year round, not just when they are visiting the island.

Many people would live on Anguilla if they could, but unfortunately they can't spend all year there, so Nori could 'take Anguilla to them' while they can't be there in person.

You could keep that holiday resort feeling from your favorite place alive by offering all sorts of products by mail order when your visitors return home, and you could have another stream of income all year round.

And that's just two ideas.

This travel business idea could be adopted by pretty much all by all of these business owners. How about these...

- Marney could offer travel packages to art seminars, conventions and exhibitions. You could do the same for your hobby
- John Birch could offer airfare and accommodation packages to all sorts of dentistry conventions and training events. If you build a service business in a different industry, you could do the same
- Judd could offer travel packages to Multi Level Marketing conventions and annual events and also to asphalt, driveway, even concrete business owners for trade shows and conventions. Again, your chosen MLM or Network Marketing program will have regular conventions and get together, why not organize your fellow member's travel arrangements?
- Jim could offer travel plans to juggling conventions all across the nation (or the world) and do the same for parrot fanciers. You could do the same for your favorite pastime
- And Jerry could do the same thing for the medical equipment field. If you become an agent/referrer, you can use your knowledge of your industry to do the same thing

In addition to the income streams our 6 business owners are already building, can you see how many options you have if you take a moment and brainstorm the different ways you could make money from home with your own web business?

But is Site Build It right for you?

Who Should Not Buy SBI?

- If you have a "teenager mentality" (i.e., someone who gets very excited about an idea, runs with it for a week or two and then loses all interest), SBI will not work for you. You need to be serious about building a business for the system to work for you
- If you desperately need money within a short period of time (a month or two), SBI is not for you. No 'real' business opportunity can provide any sort of reasonable income in such a short period of time, no matter what it's promoter might tell you...
- If your nature is to seek instant gratification, SBI will never work for you. Millions of people fall for the Get Rich Quick line and never make a dime. SBI is not like that...
- If you need to see results immediately to stay motivated and to keep going, SBI is not for you.

- If you are a “collector” of info products and tools and you never go further than buying and maybe reading a few chapters of the manual, please don't buy SBI. You won't do the system justice if you don't use it...

If you buy SBI, you'll have to put in the time, energy and effort to implement at least 80% of the strategies.

This should take anywhere from 6 to 12 months or more, depending on how much time you have available

Who Should Buy SBI?

- Only highly motivated, mature and thinking individuals should buy SBI. You'll need to have the discipline to work continually, putting in a few hours (read minimum 5 to 10 hours!) a week for at least 6 to 8 months before you're likely to see good results. But then, as our case studies show, the results can be amazing and a whole new life can open up for you
- People who want to have a whole new world opened up to them, one that they had no idea existed, should buy SBI. Imagine a teenager earning several thousand dollars a month...
- People who want to go on the journey of a lifetime and be stimulated, fulfilled, challenged and rewarded like they've most probably never been before, should buy SBI
- People who want to build a business, a business that will take on a life of its own and eventually be a “golden goose”, an asset that their kids can inherit or they could sell, should buy SBI. Just look at how much Nori and our other business owners have added to their income and asset bases with just one or two SBI sites
- People who want to meet other highly motivated, focused, sharp minded, successful, helpful and friendly humans should buy SBI. The Sitesell Forums are a meeting place for thousands of like-minded individuals all helping and learning from each other. It's truly an inspiring place to visit...

It doesn't matter if you have zero experience building a web business, as long as you meet the criteria above, the [SBI Action Guide](#), the [Sitesell Forums](#), and all of the other online help available will guide and coach you to success.

And remember, if you would like to see what other SBI owners and users *really* think about Site Build It, Sitesell, the company behind SBI, and how it has changed their lives in a positive way, the [Sitesell Forums](#) are a friendly place where SBI owners go to help and be helped, discuss various issues and give praise for Sitesell's commitment to creating and improving Site Build It.

As I mentioned in the earlier articles, you have to be a Site Build It owner to actually *post* questions on the forum, but if you become a **Sitesell Affiliate**, you can visit and read the questions and answers of others to get a feel for what owning SBI is really like.

And here's something I forgot to mention earlier. As you read through the Sitesell Affiliate Registration page, you'll also discover an easy way of **getting a 50% discount on your first Site Build It purchase as well.**

If you'd like to read what current owners are saying about SBI, warts and all, and you haven't already done so, here's all you have to do to become a Sitesell Affiliate (it's absolutely free to join) and get access to the Sitesell Forum.

Visit the [Sitesell Affiliate registration page by clicking here.](#)

When you get to the bottom of the page where it says **5 Pillar Affiliate Sign Up Form**, just fill in your details there.

Then choose a **username and password**, plus your unique Sitesell referral link (what they call your **RR URL**, don't worry, just choose something short that you'll remember easily later on – a good example for Marney would be marney01), agree to the **Affiliate Terms** by checking the box, and click on **I Agree** to submit your application.

As soon as you receive your **Welcome To The 5 Pillar Program** email message, visit the [Sitesell Forums login page](#) and use the username and password you just selected to log in.

Feel free to browse around and read through whatever areas of the forum you like. You won't be able to post a question (only SBI owners can do that) but you can use the **Search** function to find answers to any questions you may have.

I hope you enjoy reading through the Forums. Having these available is a big help to all SBI owners in finding fast, helpful answers to their questions.

It's one of the little extras you receive as a Site Build Owner that is worth its weight in gold...

Now if you've already decided that Site Build It is for you and ordered, congratulations, you're in good company.

You can do this, just like Nori, Marney, Judd, John, Jim and Jerry.

Sure there's a learning curve; every new skill requires that. But it's not that difficult, as you've seen from the diverse range of case study examples I've shared with you and the wide range of websites on the [Sitesell Results page](#).

So for now I'll leave you with this thought...what if you could do this and you didn't give it a try?

Worst case, if it all falls in a heap, at least you gave it a good try and you can chalk it up to experience...and Sitesell stands behind Site Build It with a money back guarantee.

4) Affiliate marketing is a "high reward/low risk" business option... Nori Evoy also uses affiliate programs to make money from her web business, as do most of our other case study business owners.

Why?

You don't have to develop excellent products because it has already been done for you.

You don't have to spend large amounts to manufacture and store inventory, there's no need to take and process a single order, or worry about getting paid.

You simply send people to your affiliated merchants, and then get paid when they buy.

You don't have to handle or ship a product - your merchants do that, and you'll never have to answer customer email.

Affiliate programs usually cost nothing to join (don't sign up for any that do), and your affiliate business can be started part-time from home, on a shoestring. [To get the full story on affiliate marketing, click here](#)
